

Yousef Yaequb

Backend & Distributed Systems Engineer

✉ alqadomiyousef@gmail.com ☎ 0772628056 📍 Amman, Jordan 🗣 YOUSEFXP8 🏠 Yousefalqadomi
🌐 Yousef alqadomi

Professional Summary

Third-year Computer Science student with hands-on experience in backend development, parallel systems, and cloud deployment. Experienced in designing and optimizing concurrent and parallel solutions achieving significant throughput improvements under high load. Skilled in Python, Flutter, ASP.NET, and AWS, with a strong foundation in scalable architecture and distributed computing. Competitive programmer with multiple first-place finishes. Seeking to apply engineering skills to scalable, high-performance, customer-facing systems.

Education

Bachelors in Computer Science, *Applied Science Private University*

10/2023 – Present

GPA: 90.5/100

Amman, Jordan

Relevant Coursework:

- Data Structures and Algorithms
- Database Systems
- Web-based programming
- AI
- ASP.NET
- Flutter
- Parallel Programming

Honors & Awards:

- 1st Place: JPC7 Programming Competition
- 1st Place: Inter-university Machine Learning Contest
- 1st Place: Computer Vision contest
- 2nd Place: Hour of Code
- 2nd Place: Inter-university Machine Learning Contest
- IEEE Xtreme Participation
- JCPC Participation
- Amman CPCP Participation
- AI Week Hackathon Participation
- Dean's Honor List Recipient

Projects

ml-inference-api, *Python, FastAPI, Redis, Celery, Docker*

Architected and deployed a distributed ML inference system using FastAPI, Redis, Celery, and Docker with asynchronous task queues and horizontally scalable workers. Benchmarked concurrent inference performance, reducing processing latency from 6.38s to 0.95s under load through parallel execution and queue-based orchestration

Graduation Project, *Python, NLP, XR, Reinforcement Learning, TRIBE v2*

Designed and architected a closed-loop AI-driven XR exposure therapy system integrating NLP trigger extraction, digital brain twin simulation, multimodal stimulus generation, and reinforcement learning for the treatment of PTSD, phobias, and anxiety.

Jarvis – Face Recognition System, *Python, JavaScript*

Developed a biometric face recognition system for an AI hackathon using InceptionResNetV1, achieving ~99% validation accuracy with an HUD-style interface and access control integration.

Sakina App, *Flutter / Dart*

Built a cross-platform mobile app (Android, iOS, Web, Desktop) with scalable architecture, asset management, and multi-environment deployment readiness.

interview-simulator, *React*

Built an AI-powered web interview simulator using React and LLM integration that generates role-specific questions, evaluates answers in real time, and delivers performance feedback.

Autism Parent Education, *HTML, CSS, JavaScript*

Founded and built a resource platform for parents of autistic children, providing educational materials, practical guidance, and emergency contact tools.

Skills

Back-end Development

ASP.NET Core Web API, FastAPI, RESTful API Design, JWT Authentication, asynchronous APIs, Redis, Celery

Machine Learning & Deep Learning

Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, PyTorch, OpenCV, MediaPipe

Mobile Development (Flutter)

Flutter, Dart, REST API Integration, Firebase Basics, Responsive UI Design, Material UI, JSON Parsing

Database

SQL Server, MySQL, PostgreSQL, Supabase, Firebase

Competitive Programming

Problem solving, Codeforces

Distributed Systems & Concurrency

asyncio, multiprocessing, thread synchronization, asynchronous task queues, worker orchestration, concurrent processing

Cloud Development

AWS (EC2, S3, Lambda) , Azure, Runpod, API Gateway, CI/CD pipelines, Docker

Front-end Development

Vanilla JavaScript, React.js, vue.js, Tailwind CSS, Bootstrap

Programming Languages

C#, Dart, JavaScript, Python, SQL, Java, C++

Tools & Platforms

Git/GitHub, Jupyter Notebooks, VS Code, Visual Studio

Certificates

Data Structures and Algorithms Specialization

Skills: Theoretical Computer Science, Mathematical Analysis, Data Structures, Algorithms, Algorithmic Complexity, and Problem-Solving.

IBM Back-End Development

Skills: Back-end Web Development, Responsive Web Design, API Development (RESTful APIs), Server-Side Programming, Database Management (SQL, NoSQL), and Deployment tools like GitHub.

Machine Learning with Python

Skills: Data Preprocessing, Model Evaluation, Supervised and unsupervised Learning, Deep Learning, Natural Language Processing, scikit-learn, TensorFlow.

Languages

English

Native, IELTS 7.5

Arabic
